سُلطة تنظيم الأصول الافتراضية
VIRTUAL ASSETS REGULATORY AUTHORITY

Dubai: From Market Entry to Institutional Deployment

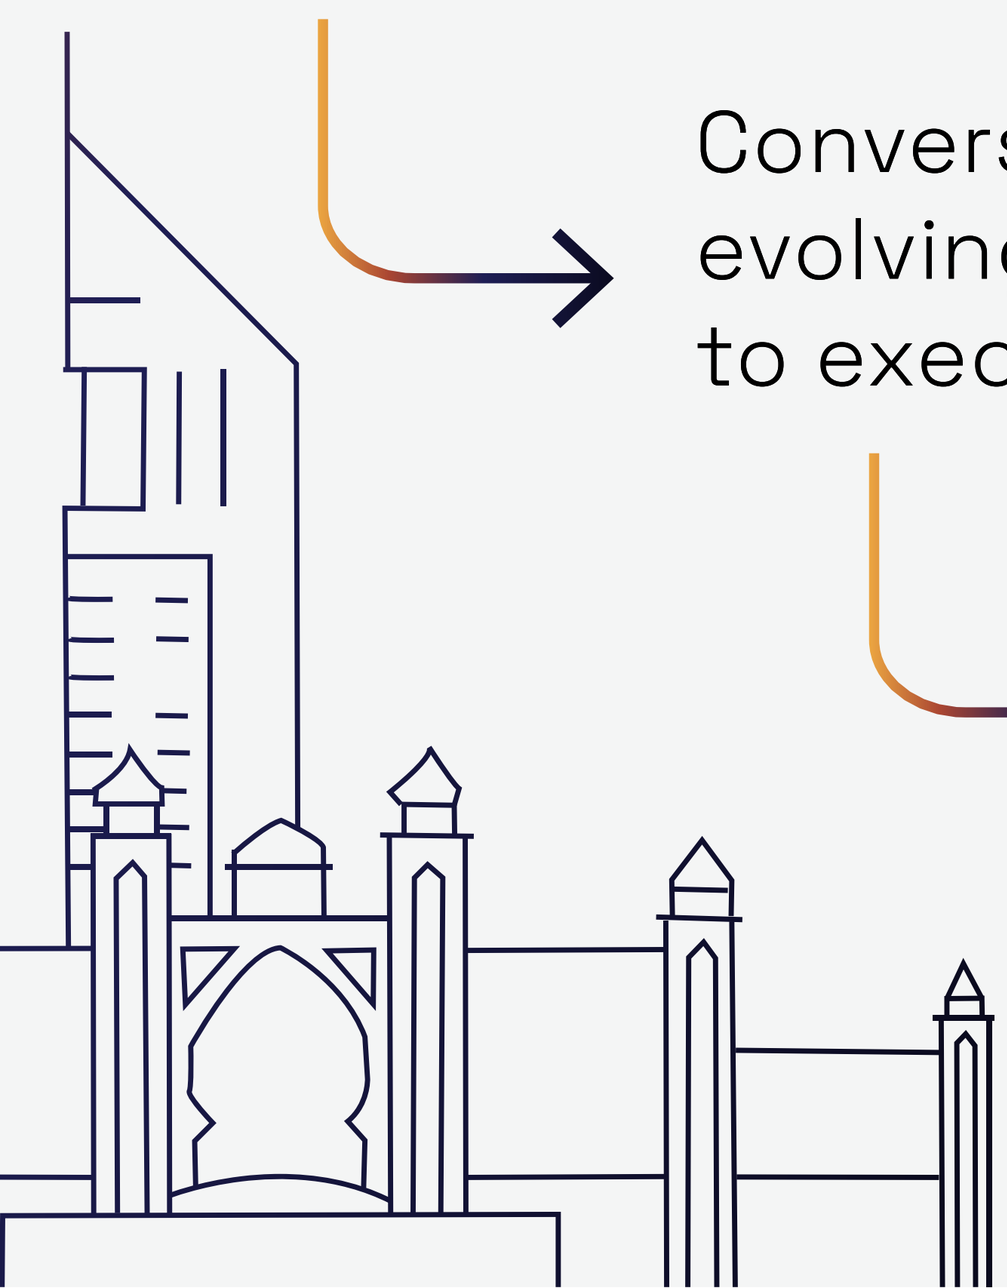

A Shift in Market Maturity

Focus moving from early-stage adoption to infrastructure

Conversations evolving from legitimacy to execution

Market increasingly defined by long-term participation

Institutional Participation Accelerating

Engagement shifting from hesitation to active onboarding

Participation expanding across 6 regulated institution types, from banks to insurers

Greater involvement from financial institutions and capital allocators

Emphasis on risk-managed participation rather than risk elimination

Regulation Enabling Execution

Clear frameworks
reducing uncertainty
for institutions

→ Defined pathways
supporting due diligence
and onboarding

→ Alignment between
regulatory clarity and
capital deployment

Infrastructure Supporting Scale

- Custody emerging as a foundational layer
- Tokenisation expanding across real-world assets
- Increasing focus on security, auditability, and compliance
- Operating within a global ecosystem of

10,000+ digital assets
